

Process	Test case	Step	Description	Status	Expected Result	Actual Result	Comment
Вступна частина (Introduction)							
The Skybot project is a web portal for the sale of electric vehicles, their servicing and repair. The project includes a web portal, a mobile version of the site and a mobile application. "Skybot has a list of products with product descriptions, online purchasing, test drive and service options. The portal has integration with a video hosting service, and the ability to leave comments and evaluate the product. Вхідні критерії (Entry Criteria)							
Agreed project requirements			https://docs.google.com/document/d/1_VKPaVrHRI7kegk1OD33L8lz8SfyyBrGhPL-Gkx7BmA/edit	Agreed, approved			
Agreed mockup			https://drive.google.com/drive/folders/1z8jHqiKa5lDeXO5lbf1wi1uY6ECdr4Fp	Agreed, approved			
Build readiness			Version 1.0.1	Developed, ready to test			
Readiness of the test environment			Hardware and emulators	Ready			
QA Team			3 junior QA, 1 Middle AQA, 1 TeamLead	Ready			
Tests to be performed							
Smoke testing							
Functional testing							
UI/UX testing							
Localization testing							
Cross-browser testing							
Cross-platform testing							
Integration testing							
Compatibility testing							
Regression testing							
Load testing							
Recovery testing							

Performance testing							
Security testing							
Penetration testing							
UAT							
Beta testing							
(Test Deliverables)							
Checklist			https://prometheus-ga.atlassian.net/browse/SBWP-4?focusedCommentId=10060				
Test cases							
Bug-reports							
Fixes							
Environments tests	Windows 10\11 test			Passed			
	Ubuntu 20+ test			Passed			
	MacOS Monterey test			Not passed			
	MacOS (emulator)			Passed			
	Android 10+			Passed			
	iOS 12+			Not passed			
	iOS 12+(emulator)			Passed			
	Google Chrome			Passed			
	Microsoft Edge			Passed			
	Mozilla Firefox			Passed			
	Safari (native)			Not passed			
	Safari (emulator)			Passed			
	Google Chrome (Android)			Passed			
Virtual servers							
Feature	KVM 1			Passed			
Processor	2 vCPU Cores						
RAM	8 GB RAM						
Disk Space	100 GB NVMe Disk space						
Bandwidth	2 TB Bandwidth						
Snapshot per week	1 Snapshot						
Backup	Weekly Backups						
IP Address	Dedicated IP Address						
Management access	Full Root Access						
Support Assistant	AI Assistant						
Exit Criteria							
All tests have been passed							

Traceability matrix is 100% covered							
All bugs fixed							
UAT passed							
Test results are confirmed by the project manager and the customer							
Release is confirmed by the customer and the project manager							
Risks and Contingencies							
Insufficient human resources before the start of testing			Human resources are sufficient, no deadlines are expected to be exceeded				
Unavailability of hardware resources for testing			The missing macOS and iOS devices were replaced with emulators				
Late availability of resources for testing (both human and hardware or software)			Not expected. All human, hardware and software resources are provided				
Level of the specialists who will conduct the testing			All specialists have a sufficient level of knowledge and training to conduct testing				
Sudden change of conditions and requirements by the customer			Scrum methodology allows you to make changes to the product throughout the development process				
Changing conditions by the customer when all tests have been completed, but the project has not yet been declared for release			Allowed. Requires additional investment and time
